

SEDIMENT FILTER

SDF SERIES SEDIMENT CARTRIDGES
are manufactured from 100%
pure polypropylene fibers.

PUREPRO SERIES 2.5" DIAMETER CARTRIDGES

PurePro series 2.5" diameter SDF cartridges coreless design is an economical solution to pre-filtration for many applications.

Used widely as pre-filtration for RO systems and post-filtration for GAC filters. Also used in applications such as Ice Machines, Film Processing, Beverage, Coffee, Analytical, Wineries, and many other applications.

PUREPRO SERIES 4.5" DIAMETER CARTRIDGES

Our 4.5" diameter SDF filters have true step filtration integrated in its design. Utilizing our technology to create 4 separate layers of micron filtration, our outside-in flow allows the outer layer to trap the larger micron particles with a much lower pressure drop. Step-by-step, trapping the larger particles layer-by-layer, allows our SDF filters a much higher dirt holding capacity than standard spun polypropylene and string wound cartridges.

PUREPRO
DRINKING WATER SYSTEM

SEDIMENT FILTER

Pure-Pro Reverse Osmosis (RO) Systems

Over ten years expertise in reverse osmosis drinking water systems, our unique design features make installation easier and operation more reliable, and our wide selection of colors and sizes allows you to solve virtually any RO application.
